

# ECO VÅTRUM

EcoDesign LOT 20 Compliant

## ROUNDLINE Eco Våtrum

### Small and efficient

Wet areas like bath and shower rooms have the same high comfort demands as other spaces. Roundline Eco Våtrum heater has an electronic thermostat and gives a comfortable heat. The even heat saves a lot of energy.

This is the smallest wetroom heater on the market that has an electronic thermostat. It keeps a low surface temperature and its safety class is IP 24 (splash proof).

#### THERMOSTAT: Elektronic

The electronic thermostat gives a temperature stability of  $\pm 0,2^{\circ}\text{C}$  regardless of the outdoor temperature. Range of temperature 5-35°C.

#### FUNCTION

The temperature knob is located on the radiator's side with an arrow and 20°C marking. Lowering the temperature: The temperature can only be lowered with the thermostat knob. A LED light lights up when the thermostat turns the heater on. When the thermostat is running normally the LED light lights up every 40 seconds and is turned on as long as needed for maintaining a steady temperature. There are both daily and weekly pre-programmed programs to choose from.

#### ROUNDLINE IS A SAFE HEATER

Roundline has a low surface temperature. The heater has no sharp corners. Roundline must not be covered. If it is, and the temperature inside the radiator becomes too high, an overheating failsafe activates.

#### MAINTANANCE

The smooth front is easy to keep clean. Roundline is easy to swing out or detach when cleaning or renovating. Vacuum from underneath the radiator.

#### SERVICE AND WARRANTY

Please contact us if you have any questions.

Warranty: 2 years.
